

MAINTAIN YOUR SMILE WITH **RETAINERS**

Without proper retention, the natural tendency of teeth is to start shifting back toward their original position. To keep this from happening and to keep your stunning new smile perfect for a lifetime, **regularly wearing your retainers is key.**

3-IN-1 RETAINER

- Retainer
- Grinding Protection
- Whitening Trays

We use discreet clear night time-only retainers that cover all the surfaces of the teeth. We call these our 3-in-1 retainers because they protect your teeth from movement, grinding and can also be used for professional whitening trays. To help ensure your Molen smile lasts a lifetime, we also place a permanent wire retainer on the backside of the lower front teeth. This double layer of retention ensures that your teeth stay straight and beautiful, year after year. For more information read our Retainer Guide.

The Original
LIFETIME
RETAINER PROGRAM

The Original
LIFETIME
RETAINER PROGRAM

Yes, we are “the original lifetime retainer program” and it can only be found at Molen Orthodontics!

OUR GIFT
RETAINERS FOR LIFE

Dr. Bruce Molen

To keep your gorgeous Molen smile looking its best year after year, retainers are key. Since the 1970s, Molen Orthodontics has been offering our famous “**retainers for life**” promise. This service, which is still rare in the orthodontic

industry, was pioneered by Dr. Molen and is one of the cornerstones of Molen Orthodontics’ commitment to its patients.

DID YOU KNOW:

Dr. Bruce Molen Pioneered the Original Lifetime Retainer Program.

WHEN WE SAY
“RETAINERS FOR LIFE”
WE MEAN IT.

If your clear retainers ever crack, break, warp, dissolve, explode, vaporize, get eaten by a pet, or sucked up by your vacuum, just bring your models in and guess what?

Free New Retainers!

FOREVER!

Even if you weren’t treated by us for your braces or Invisalign, or have never had braces before, you can still enroll in our “retainers for life” program. Just call for details and to schedule a complimentary exam to learn more.

YOUR SMILE IS
FULLY CUSTOMIZED

We believe that each smile is unique and design each person’s smile to work in harmony with their facial features. We have worked hard to develop cutting-edge techniques that allow us to create a naturally wide smile and curved smile arc instead of the narrow, flat smiles typically produced using traditional orthodontic techniques. We call this the **Molen Signature Smile**.
